COMPUTER EDUCATION

New Indian Computer Education

A National Programme of Information Technology Education & Development

(An Autonomous Institution Registered Under the Society & Charitable Trust Act, Govt. Of India)

Introduction N.I.C.E.

New Indian Computer Education (N.I.C.E.) is a national programme of information technology education and development. New Indian Computer Education, registered under Act. 21, 1860 (Reg. No. 2537) & Public Charitable Trust Act. 1882 Govt. of India. N.I.C.E. is also registered Society Act, 28, 1958 (Reg. No. 0036), Govt. Of Rajasthan. & N.I.C.E. Unit Shri Learning Services Pvt. Ltd. is also registered for services enterprise (CIN No. U80302RJ2015PTC047284), Govt. of India.

New Indian Computer Education is an ISO 9001:2008 Certified Organization for Quality Management System. The Institute has also filled application (Word mark N.I.C.E.) for Name & Logo registration under Ministry of Commerce & Industry, Department of Industrial Policy & Promotion, Controller General of Patents Designs and Trade Marks, Govt. of India.

The main function of the society is to provide higher technical education in nominal charges for every group of society of Urban & Rural areas all over India and get success in computer revolution which is the main dream of Indian Govt.

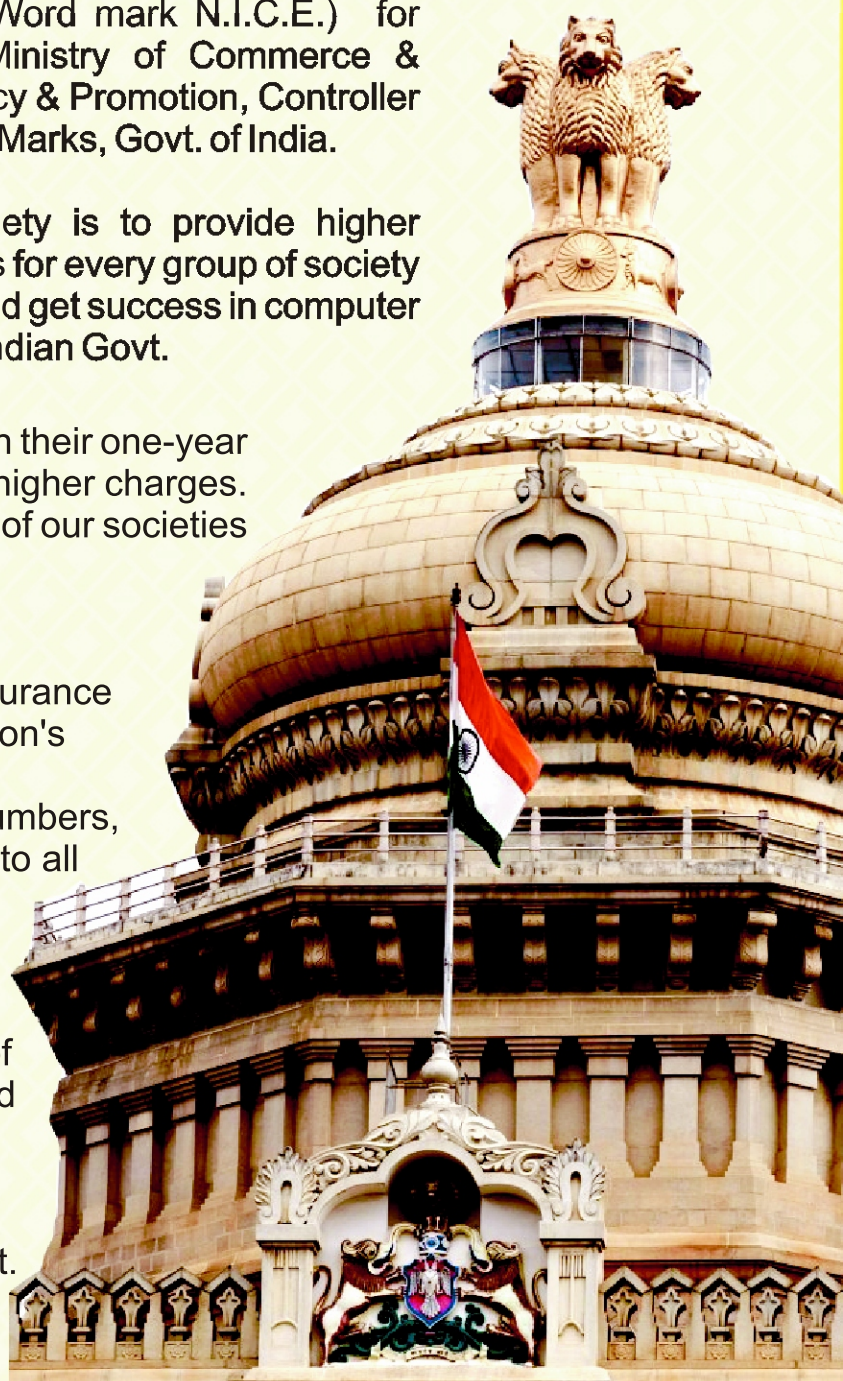

In present time, some big Institution run their one-year or more than one-year programme in higher charges. Due to which the middle class families of our societies cannot afford the load of their charges.

MISSION

To be the single source for quality assurance in computer education among the nation's non-formal institutes, After turning out competent IT professionals in large numbers, N.I.C.E. reach is now being extended to all regions of the country.

VISION

To be the leader in the development of industry oriented quality education and training and be the country's premier Institution for examination and certification in the field of Information Technology Education & Development.

Director's Message

Information Technology has become a fastest growing Industry in today's scenario which is providing thousands of job to well trained professionals. India has achieved a terrific growth in this field and is being considered as a potential I.T Super Power in the world. Information Technology is providing the upcoming future that will change every face of human existence.

In order to produce Information Technology Professionals, I.T education requires a high quality competence and infrastructure. Today, new packages, newer versions of current software and new technological tools are being adopted by the trade and industry periodically. The education therefore, must catch up with these developments well in time so that I.T students do not face the problem of obsolescence. New Indian Computer Education (N.I.C.E.) feels the underlying concepts of new technology and tools along with reasonable skills be delivered to the students before they go out in the industry.

Thus in a very fast changing technical scenario, concept and practical based education becomes quite important as against tool based education. Technological changes also demand that institutions must consider the market scenario, and adjust the contents and delivery of education matching the expectations of the business houses.

I am sure our students can meet any demand & challenges that the employer may have on them. I wish them great success in all their Endeavour's and quest for a better tomorrow.

लहरो से डर कर नौका पार नहीं होती,
कोशिश करने वालों की हार नहीं होती।

असफलता एक चुनौती है, इसे स्वीकार करो,
क्या कमी रह गई, देखो और सुधार करो।

जब तक न सफल हो, नींद चैन को त्यागो तुम,
संघर्ष का मैदान छोड़ मत डर कर भागो तुम।

कुछ किए बिना ही जय जय कार नहीं होती,
कोशिश करने वालों की हार नहीं होती।
